ABOUT THE COLLEGE

Holistic Development means economic growth that creates employment opportunities and helps in reducing poverty. It means having access to essential services in health and education by the poor peoples. It includes providing equality of opportunity, empowering people through education and skill development.

Holistic development is a comprehensive approach in learning which aims to develop multiple facts or abilities of a human brain. Conventional educational and learning systems aim at the development of intellectual capabilities only. But holistic growth aims at the development of physical capabilities, intellectual abilities, cognitive or mental abilities, emotional abilities and social skills.

Taking a holistic approach to education means focusing on all aspects of a child's growth, not just their academic advancements. Most importantly, it's about establishing the child's overall wellbeing. The same is true for children. They must feel healthy, safe and cared for only then are they able to learn effectively.

- *The Processes & Periods of Holistic Development
- *Social – Emotional Development
- *Physical Development *Cognitive Development
- *Linguistic Development * Holistic Education
- *Holistic Development Leads to Transversal skills
